

How to make a

Time Capsule

1. Choose your container.

Choose a container in which to store your video. It depends on how long you are going to store it. For example: shoebox, wooden box, jam jar...

2. Decorate and label it.

Make an attractive design and glue it on the container. Don't forget to type a retrieval date. Place it on the side of the capsule.

3. Close it.

Close it tightly to make sure no dirt or rain gets in.

4. Bury it!

Finally, dig a hole in the ground, drop your time capsule in and cover it.
