

Mike's Life Cycle

Mike's Life Cycle

1947

1952

1964

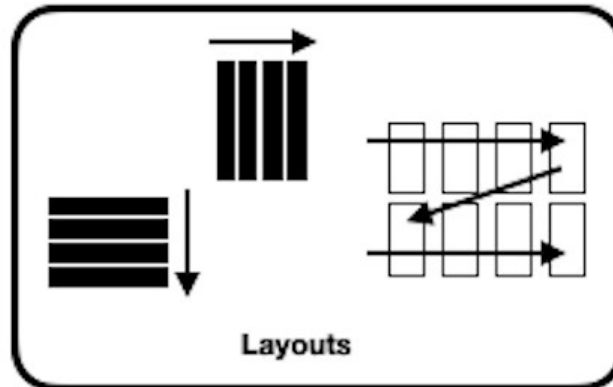

1987

2022

<p>He's a baby. He can't do anything for himself.</p> <p>He only drinks milk. He needs lots of sleep.</p> <p>When he is about one year, he learns to walk, talk and eat.</p>	<p>He learns to be more independent than babies.</p> <p>He starts school, In this phase, he learns to do lots of things, such as: reading or writing.</p>	<p>He is 17 years old. He gets ready to be an adult. He is more independent than children.</p> <p>His body changes a lot. He gets taller and there is even more brain development during this time.</p>	<p>He is an adult. He gets his job and he lives on his own or with his partner.</p> <p>He has two children, they have their human life cycle too.</p>	<p>He is in his later stage of being an adult.</p> <p>He is retired. He is not as strong as before.</p> <p>He has two grandchildren, he is a great grandfather.</p>
