

Crazyland

This is a wonderful city. The name of the city is Crazyland. The location of the city is crazy because it is in the North Pole but next to the South Pole. Yes, I know. However, it is always summer in Crazyland, that is why there are a lot of umbrellas in the streets in order to keep the sunlight away from people. Crazyland is well connected with other cities because you can find five ports, two airports, but there isn't any hotel. Crazylanders don't like going to the supermarket, they prefer going to one of the two department stores that there are in the city. There is only one shopping centre next to the police station, they have everything you need.

People are healthy in this city. They can go to the four sports centres that are in Crazyland. At the weekend, people usually go to arcades, there are five around the city. Also, there is an amusement park that opens on Sundays. In the area, there are two restaurants and three cafés.
